

Introducing

Cosmos Zero-Gravity Sleep System

“The Revolutionary solution to your restless sleep and your sore achy muscles.”

TARGET MARKET:

- General public with special attention to those predominant side sleepers
- Medical Facilities

FEATURES:

- Quality materials
- Inflatable bladder
- Arm comfort
- Perfect neutral postural positioning
- Leg cushion's concave design

PATENT INFORMATION:

A provisional patent application was filed in March of 2023 and is in patent pending status.

SUMMARY:

Most people have a pillow that is too high or low to assure proper neck alignment. This causes an unhealthy tilting of the cervical vertebrae. When lying on ones side the top arm falls towards the bed and pulls the mid back muscles away from the spine causing undo strain on the region. Even if people place a pillow between their legs while sleeping the top leg will slide forward causing twisting of the lower back.

The Cosmos Zero-Gravity Sleep System assures the sleeper complete perfect spinal alignment while reducing

strain on the muscular system. The head pillow has an inflatable bladder serving 3 purposes. Firstly to zero in the correct thickness of the pillow between the shoulder and base of the neck for proper cervical alignment. Secondly, one can grow with the pillow as you can inflate or deflate the bladder at anytime. Thirdly, upon deflating the bladder it makes the pillow more convenient for traveling.

The arm cushion has a dual purpose. Its main task is to cradle the upper arm in a neutral position resolving the issue of the arm falling towards the bed that will create strain on the mid back vertebrae and musculature. The cushion also has an arch cut out for the lower arm to go through if preferred.

The leg cushion's concave design keeps the legs in place as to not allow the top leg to slide over the bottom leg causing the twisting of the low back, while simultaneously placing the legs in the correct angle of bend for comfort for the knees and hips. Trust these NASA measurements, combined with the quality materials to assure you of the best nights sleep and most refreshed body.

Arch cut out for the lower arm to go through .
